

Guide: Create Private API key for Klaviyo

1. Login to your **Klaviyo account**
2. Go to the left bottom corner and click on your username to open the dropdown that contains settings page link
3. In the settings page, go to Account tab then API keys sub-tab

4. Click on “Create private API key”
 - a. Enter name of the key (any descriptive name you want)
 - b. Select access level → Read-only key
 - c. Click on “Create”

5. The API key will only be visible once its created so make sure you copy and save it somewhere secure or just directly into Adaly authentication page
